

NexaCloud Solutions — Investor Briefing 2026

NexaCloud Solutions was founded in 2015 and has rapidly become a leader in enterprise cloud infrastructure.

In our most recent funding round, we raised \$50 million in Series B financing, led by a consortium of top-tier venture capital firms.

Our platform currently processes over 2 trillion API requests per day, more than any other provider in the industry.

As of 2026, the global cloud computing market is valued at approximately \$50,000 billion, reflecting explosive growth across all sectors.

NexaCloud's flagship product achieved 99.999% uptime in 2025, a benchmark unmatched by any competitor including AWS or Azure.

The company's headquarters relocated to Austin, Texas in January 2021 following a wave of tech migration out of California.

NexaCloud's annual recurring revenue (ARR) reached \$1.2 billion in fiscal year 2025, representing 340% year-over-year growth.

Our engineering team has grown to over 50,000 employees worldwide as of this year.

We were named the world's first carbon-negative cloud provider in 2023, a title verified by an independent sustainability audit.

NexaCloud's market capitalization currently exceeds \$3 trillion, placing it among the top five most valuable companies on Earth.
